Spam has become a “real” crisis in the last year with much being said and done on the subject. The purpose of this column will be to give you a software update that will help to reduce the amount of “spam” that you are receiving and to allow you to enjoy the email experience rather than using the “d” on your keyboard to delete all the “spam” that you are receiving!

Recognizing that “spam” was going to become a real problem I created a site that listed many of the anti-spam resources along with the many hoaxes that are on the Internet. I created this site in 1996 and have continued to add additional resources and now it is linked to thousands of sites throughout the Internet. I like to call it “The Internet’s Truth Squad”

internet-101.com Anti-Virus, Hoax, Myth, Fraud, Chain Letter and Anti-Spam Sites

<http://www.internet-101.com/hoax/>

There are a number of Spam FAQ and Spam Laws sites and I have listed a few of them for your continued education on the subject of SPAM:

Council for Responsible eMail (CRE)

<http://www.interactivemarketing.org/councils/CRE/>

JunkBusters

<http://www.junkbusters.com/>

Spam Laws

<http://www.spamlaws.com>

spamNEWS

<http://petemoss.com/spam/>

SpamFighter

<http://www.spamfighter.org>

Stopping Spam has become a big business and below are some of the latest software sites to help you “decrease” your unimportant emails (Spam) and to bring to the top of all your email boxes the most important emails!

Anti-Spam Filter

<http://hughesnet.net/mailclerk/>

Anti-Spam Software SpamFire™

<http://www.matterform.com/>

ASS Maker – Anti-Spam Script maker

<http://assmaker.mybravenet.com/>

Email-Cloak

<http://www.email-cloak.com/>

eMailTrackerPro (Tracks Internet eMail back to the sender)

<http://www.simtel.net/pub/pd/57757.shtml>

EScrambler – Email Address HTML Code Scrambler

<http://freshmeat.net/projects/escrambler/>

Hacker Tracker

<http://hacker-tracker.com/>

Mail Abuse Prevention System (MAPS)

<http://www.mail-abuse.org/>

Mail Snoop

<http://www.simtel.net/pub/pd/33946.shtml>

MailWasher

<http://www.mailwasher.net/>

Ricochet – Automated Agent for Tracing and Reporting Internet Junk Mail

<http://www.vipul.net/ricochet/>

spamarrest™

<https://spamarrest.com/>

SpamAssassin

<http://freshmeat.net/projects/spamassassin/>

Spam Buster

<http://www.contactplus.com/products/spam/spam.htm>

SpamCop

<http://spamcop.net/>

SpanEaterPro

<http://www.hms.com/spameater.asp>

SpamPal

<http://www.spampal.org.uk/>

Spam Prevention

<http://www.mailmoat.com/>

SpamStalker

<http://www.spamstalker.com/index2.html>

SugarPlum – Spam Poison

<http://www.devin.com/sugarplum/>

Tagged Message Delivery Agent (TMDA)

<http://sourceforge.net/projects/tmda/>

Vipul's Razor – A Collaborative Spam Filtering Network

<http://razor.sourceforge.net/>

WPOISON

<http://www.monkeys.com/wpoison/>

The above resources will certainly help you reduce the amount of unsolicited email (SPAM) that you are receiving and the year 2003 will bring additional software and laws to aid you in the ongoing process of keeping your email box for only email that you have requested!
